The results aligned

I didn't know about Incognito at all before this questionnaire

At my searches, as you can see there aren't many differences between typical and incognito search. Maybe because I have never used incognito

Google in incognito mode, provides a disclaimer window, in which inform you about cookies and data. If someone approves the use of cookies and data in incognito mode, maybe the two modes doesn't have any differences....

test. Great update, some small suggestions in mail and you are good to go i think!

I use Google in English and tend to get results in English and English based media. My searches even when living in Turkey might not reflect what most other Turkish citizens receive.

I would prefer to view completely unbiased results, even if they do not match with my personal beliefs.

Considerable difference between the Results!

good luck!!!!

Final Thoughts: If you have any additional comments, feedback, or thoughts...

Good luck with your thesis!

Xxx

The questionnaire is well structured and thoughtfully designed. The questions are clear and relevant to the research objective and the instruction given guide the respondents to answer the questions accurately and with ease. Overall, there is a logical flow to the sequencing of the questions , starting with broader questions and moving into more specific ones.

good luck!
